

PLANET EARTH CELEBRATION - 'How to Have a Green Home'

At the 2010 Planet Earth Celebration, an expanded **ASK THE EXPERTS** area will provide event goers with insight into many sustainable concepts and projects that people can implement inside and outside their home. Separate booths within this area will focus on individual green-home topics, with a strong emphasis on awareness and education, so that attendees can come away with the knowledge to make informed decisions on minimizing their environmental footprint.
